The unnecessary information in Klein is not deleted via the network. There is no mention of the network in Klein's specification. Klein deletes the unnecessary information by the Message Manager 157 (Col. 6, lines 17-39). The role of the network in Klein is merely to transport messages from the Message Distributor 134 to the Message Manager system 157 (Col. 3, lines 59-61).

Accordingly, Klein does not delete unnecessary information via the network.
